Q12 What impact will the event have on your future clinical practice?

Answered: 68 Skipped: 24

#	RESPONSES	DATE
I	It has helped me decide to do geriatrics	11/25/2017 4:48 PM
2	The event made me think of my future career goal. To be honest, I'm still looking out for the specialty I'm passionate in. This could be it. Also, I learned a lot that I can use it right away in my department when I get back to work.	11/11/2017 11:32 PM
3	Parkinson's talk Dementia talk All of them really useful	11/10/2017 9:29 PM
4	Important points to consider on a variety of subjects in elderly medicine	11/10/2017 12:27 PM
5	I will be working even harder to become a "geriGP" and hopefully use the information from the conference to help people in the community	11/9/2017 8:34 PM
6	Improved knowledge on frail older patients.	11/9/2017 2:14 PM
7	Be more confident to try and make change even though I am a junior	11/9/2017 9:19 AM
8	None	11/8/2017 10:53 PM
9	Improved confidence with regards to managing Parkinson's medications (very good talk)	11/8/2017 11:38 AM
10	mroe awareness of geriatric needs	11/7/2017 9:50 PM
11	Definitely affect my management of Parkinson's patients in hospital, and think in more detail about delirium	11/7/2017 12:24 PM
12	Has really made me consider geriatrics as a future career option.	11/7/2017 9:30 AM
13	More confident in advocating in behalf of my patients Better clarity about what to do with pd meds when patients cannot swallow	11/6/2017 5:51 PM
14	Help me to inform future decisions about patient care. I am really considering a career in geriatrics.	11/6/2017 5:32 PM
15	Considering geriatrics as a potential career option.	11/6/2017 3:41 PM
16	I think it has convinced me to choose Geriatrics as my career, so quite relevant.	11/6/2017 3:20 PM
17	It will help me when looking after patients with Parkinson disease, the lecture and paper information was of great value	11/6/2017 2:42 PM
18	useful lectures with learning/take home points	11/6/2017 2:30 PM
19	I have picked up many tips to help me improve the service I can provide for patients.	11/6/2017 2:16 PM
20	makes me enthusiastic to pursue a career in geriatrics	11/6/2017 2:10 PM
21	Really makes Geriatrics sound fun, rewarding, interesting. Lots of inspiring enthusiastic geriatric registrars make it an extremely attractive career option.	11/6/2017 9:55 AM
22	Less nervous about being med reg. More encouraged to keep being a generalist	11/6/2017 9:14 AM
23	how to adequately manage patients and be aware of the correct services thery may benefit from	11/6/2017 8:56 AM
24	I will consider geriatrics to subspecialise	11/6/2017 7:10 AM
25	I found the ideas of pre-dying interesting. I often have EoL discussions with a family and they sometimes say something along the lines of "A doctor said she was likely to die soon last time we were in hospital" and its clear that they have had time to reflect on this which is beneficial to the patient and the family in general	11/6/2017 2:55 AM
26	Reconfirmed my decision to pursue a career in geriatrics	11/6/2017 12:17 AM
27	It will help me to address the needs of my patients better. I have a renewed interest in geriatrics.	11/5/2017 9:47 PM
28	Will make me consider specific things about managing elderly patients differently	11/5/2017 9:41 PM
29	I will endeavour to provide the best care possible for all my elderly patients	11/5/2017 9:28 PM

Geriatrics for Juniors' Conference - Feedback form

Encouraging me to pursue geris training 11/5/2017 9:21 if 11/5/201																																									
Extremely motivated that you really can make a difference to the elderly in hospital and geri's is a great career option Helpful to talk to registrars in the period leading up to applying for registrar job. Very inspired with geriatrics Confirmed geriatrics is for me Tips of the tips about deal with PD on the acute take and see a new approach to orthogeriatrics in the period leading up to applying for registrar job. Very inspired with geriatrics is for me Tips of More idea of what geriatrics is about will help with choosing a specialty. Also will remember some of the tips about delinium, palliative care, neuroimaging, who should be for surgery, considering TIU. It will look to implement aspects that I have learnt from the conference in particular around falls prevention and recognising and managing delinium appropriately It's boosted my enthusiasm for Acute Medicine with a Geriatric twist-I'm going to go back and try to implement some of the practices spoken about in the lectures such as delerium assessments and Parkinson medications reconciliation. Better awareness of techniques used in dementia and delinium patients Lots of practical tips to change how I care for the elderty. Jugarangement in Parkinson's disease. Encouraged me to reconsider a career in medicine and taking on the med reg challenge. Lots of practical tips to change how I care for the elderty. Jugarangement in Parkinson's disease. Encouraged me to reconsider a which will help me make small (but important) changes to the way I practice provided more insight into the medical registrar job and lifted some anxiety associated with it Jugarangement in the medical registrar job and lifted some anxiety associated with it Jugarangement in the medical registrar job and lifted some anxiety associated with it Jugarangement in the medical registrar job and lifted some anxiety associated with it Jugarangement in the medical registrar job and lifted some anxiety associated with it Jugarangement in the medical registrar job and lifted some anxi	rsue	e to pur	to pur	purs	ırsu	ue g	geri	is t	tra	ain	nin	ıg																							11/	5/2	017	9:	21	PM	
Extremely motivated that you really can make a difference to the elderly in hospital and geri's is a great career option Halpful to talk to registrars in the period leading up to applying for registrar job. Very inspired with geriatrics geriatrics If feel more equipped to deal with PD on the acute take and see a new approach to orthogeriatrics. 11/5/2017 12:48 in geriatrics is shout will help with choosing a specialty. Also will remember some of the tips about delirium, palliative care, neuroimaging, who should be for surgery, considering ITU. More idea of what geriatrics is about will help with choosing a specialty. Also will remember some of the tips about delirium, palliative care, neuroimaging, who should be for surgery, considering ITU. I will look to implement aspects that I have learnt from the conference in particular around falls prevention and recognising and managing delirium appropriately It is boosted my enthusiasm for Acute Medicine with a Geriatric with-IT going to go back and try to implement some of the practices spoken about in the lectures such as delerium assessments and Parkinson medications reconciliation. Better awareness of techniques used in dementia and delirium patients 11/5/2017 10:17 Drug management in Parkinson's disease. Encouraged me to reconsider a career in medicine and taking on the med reg challenge. Lots of practical tips to change how I care for the elderly. 11/5/2017 8:15 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:15 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:15 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:01 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:01 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:01 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:01 Journal of practical tips to change how I care for the elderly. 11/5/2017 8:01 Journal of practical tips to change how I c	/qip	o audit/o	audit/	dit/q	t/qip	p, w	vill	CO	ons	sid	der	r m	ne	d r	reç	3																			11/	5/2	017	5:	20	PM	
great career option Helpful to talk to registrars in the period leading up to applying for registrar job. Very inspired with geriatrics I feel more equipped to deal with PD on the acute take and see a new approach to orthogeniatrics. If feel more equipped to deal with PD on the acute take and see a new approach to orthogeniatrics. I1/5/2017 12:39 More idea of what geriatrics is about will help with choosing a specialty. Also will remember some of the tips about delirium, palliative care, neuroimaging, who should be for surgery, considering ITU. If would like to be a geriatrician I will look to implement aspects that I have learnt from the conference in particular around falls prevention and recognising and managing delirium appropriately It's boosted my enthusiasm for Acute Medicine with a Certaitric twist- I'm going to go back and try to implement some of the practices spoken about in the lectures such as delerium assessments and Parkinson medications reconciliation. Better awareness of techniques used in dementia and delirium patients II practicularly enjoyed the all of the tips and tricks that the speakers shared which will help me make taking on the med reg challenge. It particularly enjoyed the all of the tips and tricks that the speakers shared which will help me make shall (but importably changes to the save type and palients. If confirmed geriatrics is the career for me, few take home messages from talks I wasn't aware of that I feel I can share with my colleagues and palients. If have always loved geriatrics and am just about to apply for a CMT post. Will take forward the tips given regarding delirium, Parkinsons disease etc 11/4/2017 8:28 ft The conference reaffirmed my desire to pursue geriatrics as a career. It served as some good revision of Parkinson's disease and I feel more confident that I might be able to pick up a patient with signs of Parkinson's. Overall geratric assessment It has given me the confidence to apply to geriatrics in the future. I feel I will have clearer thought process Major impact I have already identified developmental needs as well as areas of practice that I want to change as a result of what I heard today. Interesting ideas about front of house geriatrics - may consider going to course 11/4/2017 6:34 ft Being better advocates for elderly patients. Asking about hallucination as part of systems review. 11/4/2017 6:13 ft																			ie	m	ess	sag	es	fro	m i	alk	s I	Wa	asn	t av	vare	of		,	11/-	4/2	017	' 10):38	3 PI	M
To inspire other Physio's to attend in the future. To be more aware of delirium, differential diagnosis and the real things that matter at eol. Will take forward the tips given regarding delirium, Parkinsons disease etc 11/4/2017 8:28 ft. The conference reaffirmed my desire to pursue geriatrics as a career. It served as some good revision of Parkinson's disease and I feel more confident that I might be able to pick up a patient with signs of Parkinson's. Overall geratric assessment 11/4/2017 8:01 ft. Geriatrics for Juniors' Conference - Feedback form

60	Now strongly considering gerutrucs as a future career	11/4/2017 6:10 PM
61	Encouaged me to apply for geriatrics and to continue to strive for better even if the system tries to get you down.	11/4/2017 6:06 PM
62	Reminder to continue to be a generalist regardless of whatever I ultimately specialise in, and also while I continue I look after patient's as a junior now.	11/4/2017 5:58 PM
63	Will make me enjoy and appreciate the bits of geris I love	11/4/2017 5:51 PM
64	Picked up a few clinical and communication hints and tips, a couple of contacts and some career advise I will also now have a pen for my night shift night!	11/4/2017 5:50 PM
65	Not to use the term 'mechanical fall' and assess the multifactorial risk better. Also using the pdmedcalc especially out of hours when managing PD patients.	11/4/2017 5:26 PM
66	Inspired me to pursue Geriatrics as a speciality career	11/4/2017 5:18 PM
67	Orthogeriatrics - will help my practice in terms of pre & post op care	11/4/2017 5:14 PM
68	Focus more in delirium in the elderly and on the multifactorial falls assessment.	11/4/2017 5:04 PM
